State-of-the-art electrosurgery solutions…

STERIS Endoscopy is proud to offer a full line of electrosurgery solutions including the compact gi4000 electrosurgery unit and an array of complementary disposable accessories.

gi4000 electrosurgery unit | gi 4000

- Designed specifically for flexible endoscopy, the gi4000 has Argon, Monopolar, Bipolar and Lavage functions all built into one easy-to-use, compact unit.
  - Argon coagulation, two pulse cut modes for sphincterotomy, true GI bipolar, TouchSoft® coagulation and multiple polypectomy choices. EMR, ESD and POEM capable.
- Compact argon gas canister screws directly into the gi4000 unit so it fits on any boom, travel or endo cart.

ArC Smart™ argon coagulation probe

- Is a perfect companion to the gi4000 ArC Smart linear beam and ensures optimum beam and energy delivery whenever needed.
- Stiffness for flexible endoscopic maneuvers, including side viewing scopes.
- The ArC Smart argon probe is available in multiple sizes and lengths.
- One single use, disposable ArConnect® probe connector is required for each argon coagulation procedure in order to attach compatible argon probes.

TouchSoft Coagulator® monopolar probe

- Is a cost savings accessory alternative for contact hemostasis and ablation.
- Offers self-limiting results when paired with TouchSoft coagulation output on the gi4000 unit or soft coagulation low voltage modes.
